

»» | **AirLink Vehicle Telemetry Application (AVTA) 1.0.1 Release Notes**

AirLink Vehicle Telemetry Application (AVTA) 1.0.1 is only for AirLink GX450 and MP70 gateways. It is not compatible with AirLink LS300, AirLink RV50, AirLink GX400/440, or AirLink ES Series Gateways.

AVTA 1.0.1 is available on the AirLink Management Service (ALMS) as a public application. It requires the supported gateway to be running ALEOS 4.5.1 or higher.

Bug Fix

Resolved an application error caused when some vehicles sent unexpected telemetry parameters, which resulted in AVTA ceasing operation.
